

## CONTENTS

### Section 1 – Abutments

Abutment Investigation .....	Jan 1988 .....	1-1, 1-2
Diaphragm Abutment Without Footing .....	Jan 1988 .....	1-3
Diaphragm Abutment With Footing .....	Jan 1988 .....	1-4
Short Seat Abutment .....	Jan 1988 .....	1-5
High Cantilever Abutment .....	Jan 1988 .....	1-6

---

### Section 2 – Footings

*pages 2-1 through 2-5.16 are renumbered and placed in Section 13 dated August 1989*

Seal Courses .....	Jun 1990 .....	2-6
Seal Courses (cont.) .....	Jan 1982 .....	2-7

---

### Section 3 – Retaining Walls

Earth Retaining Systems .....	Jul 1989 .....	3-1.1, 3-1.2
Earth Retaining Systems (cont.) .....	Jan 1990 .....	3-1.3, 3-1.4
Earth Retaining Systems (cont.) .....	Jul 1989 .....	3-1.5- 3-1.12
Magnitude, Location and Moment Horizontal		
Earth Pressures for Retaining Walls .....	Jan 1990 .....	3-4
Cantilever Wingwall Design .....	Jul 1989 .....	3-6
Mechanically Stabilized Embankment .....	Apr 2002 .....	3-8.1
Welded Wire Mat Density per Full Face Panel ...	Apr 2002 .....	3-8.1 - 3-8.3
Loading Conditions .....	Apr 2002 .....	3-8.4
Foundation Pressure in Kips per Sq. Ft. ....	Apr 2002 .....	3-8.5 - 3-8.9

## Section 3 – Retaining Walls - *continued*

Foundation Pressure in Kips per Sq. Ft. –

Loading Condition 4E .....	Apr 2002 .....	3-8.10
Forces: Cantilever Sign Truss on Retaining Wall .....	May 1989 .....	3-9, 3-9.1

---

## Section 4 – Concrete Slabs

Standard Slab Bridge – General Instructions .....	Sep 2004 .....	4-10.1
Makeup of Plans .....	Sep 2004 .....	4-10.1
Basis of Design .....	Sep 2004 .....	4-10.3
Standard Slab Bridge – Slab Details –		
Single and 2 Span .....	Mar 1989 .....	4-11
Standard Slab Bridge – Slab Details – 3 Spans .....	Mar 1989 .....	4-12
Standard Slab Bridge – Slab Details – Multi Span .....	Mar 1989 .....	4-13
Standard Slab Bridge – Slab Details – Hinge at Bent ..	Mar 1989 .....	4-14
Standard Slab Bridge – Slab Details – Hinge at L/6.....	Mar 1989 .....	4-15
Standard Slab Bridge – Support Design Data No. 1.....	Mar 1989 .....	4-16
Standard Slab Bridge – Support Design Data No. 2.....	Mar 1989 .....	4-17
Standard Slab Bridge – Typical Support Calculations ...	Mar 1989 .....	4-18.1 - 4-18.4
Slab Hinge Details .....	Mar 1989 .....	4-19
Slab Reinforcement Details .....	Mar 1989 .....	4-20
Slab Bridge Pile Details .....	Mar 1989 .....	4-21

---

## Section 5 – Concrete Design

Standard Notations and Design Formulas .....	May 1962 .....	5-1
Standard Notations and Design Formulas (cont.) .....	May 1971 .....	5-2
Concrete Design .....	May 1962 .....	5-3

## Section 5 – Concrete Design - *continued*

Resisting Moments of Beams and Slabs for Balanced	
Design and Compressive Reinforcement .....	Feb 1968 ..... 5-10
Resisting Moments for Flanges of Box Girders and	
T-Beams (Foot-Kips) .....	Feb 1968 ..... 5-10.1, 5-10.2
Table of Unit Values .....	Mar 1968 ..... 5-11, 5-12
Box Girders – Moments of Inertia and Weight Tables .	Jun 1963 ..... 5-13
Moments of Inertia for T-Beams .....	Jul 1967 ..... 5-13.1 - 5-13.3
T-Beams – Moments of Inertia and	
Weight Tables 11" Stem .....	Jan 1964 ..... 5-14
T-Beams – Moments of Inertia and Weight	
Tables 13" Stem .....	Jan 1964 ..... 5-14.1
Charts for Resisting Moments – Box Girders .....	Jul 1967 ..... 5-14.3
Graph – Resisting Moments – Slab = 5 ½" .....	Jul 1967 ..... 5-14.4
Graph – Resisting Moments – Slab = 6" .....	Jul 1967 ..... 5-14.5
Graph – Resisting Moments – Slab = 6 ¼" .....	Jul 1967 ..... 5-14.6
Graph – Resisting Moments – Slab = 6 ½" .....	Jul 1967 ..... 5-14.7
Graph – Resisting Moments – Slab = 6 ¾" .....	Jul 1967 ..... 5-14.8
Graph – Resisting Moments – Slab = 7" .....	Jul 1967 ..... 5-14.9
Column Design Charts .....	Nov 1974 ..... 5-15 - 5-22
Shear Modification for Skewed Concrete Girders .....	May 1990 ..... 5-31 - 5-38
Steps for Accessing and Running PSHEAR .....	May 1990 ..... 5-39
Inverted T-Caps .....	Oct 1995 ..... 5-41 - 5-50
Inverted "T" Bent Cap Design Example .....	Oct 1995 ..... 5-51 - 5-66
Areas and Perimeters for Various Bar Sizes	
and Number of Bars .....	Aug 1966 ..... 5-71
Areas and Perimeters for Various Bar Sizes	
and spacing .....	Aug 1966 ..... 5-72
Anchorage to Concrete.....	Mar 1991 ..... 5-81 - 5-92

---

## Section 6 – Prestressed Concrete

Precast Prestressed Girders .....	Mar 2001 .....	6-1A
Caltrans Standard "I" Girder .....	Mar 2001 .....	6-1A
Caltrans Standard "Bulb-Tee" Girder .....	Mar 2001 .....	6-1B
Caltrans Standard "Bathtub" Girder .....	Mar 2001 .....	6-1C
Prestressed Trapezoidal Box Girder .....	Nov 1981 .....	6-2
Precast Prestressed Concrete Box Girder .....	Nov 1961 .....	6-3
Nomograph for Frictional Loss and Cable Elongation ..	May 1962 .....	6-10
Prestressed Concrete Slabs .....	Jul 1994 .....	6-11

---

## Section 7 – Steel Design

Composite Girder Approximate Flange Areas .....	Aug 1963 .....	7-1
Moments of Inertia of One Plate/Two Flanges .....	May 1962 .....	7-10 - 7-13
Data for Design of Steel Connections .....	Jul 1963 .....	7-15
General Information (Rivets, Bolts, Welds, etc.).....	Oct 1966 .....	7-16
Steel Connections, Length of Weld or Number of Bolts .....	Mar 1971 .....	7-17
Properties of Welded Columns and Beams .....	Jan 1963 .....	7-21 - 7-27

---

## Section 8 – Influence Lines

Validation for Section 8 .....	Feb 1990 .....	8-0
Influence Lines for Continuous Spans .....	May 1962 .....	8-1 - 8-32
Influence Lines for Four Equal Spans .....	Jan 1963 .....	8-35 - 8-43
Envelope Curves for Moment – Interior Span .....	May 1963 .....	8-45
Envelope Curves for Moment – 3 Equal Continuous Spans .....	Jul 1963 .....	8-46
Envelope Curves for Moment – 2 Equal Continuous Spans .....	May 1963 .....	8-47

---

## Section 9 – Live Load Moments and Shears

Validation for Section 9 .....	Jun 1989 .....	9-0
HS20-S16(44) Loading .....	May 1962 .....	9-1
Simple Beam Shear – One Lane .....	May 1962 .....	9-10
Simple Span Shear (Kips) – One Lane .....	Apr 1979 .....	9-10A
Bending Moments – Simple Beam .....	Apr 1963 .....	9-11 - 9-16
Moments, Shears and Reactions for Continuous		
Spans – Live Loading .....	May 1962 .....	9-20
Moments, Shears and Reactions for Continuous		
Spans – Live Loading (cont.) .....	Aug 1967 .....	9-21
One Lane Live Load – Simple Span –Shears and		
Reactions .....	May 1962 .....	9-22 - 9-30
One Lane Live Load – Hinge at 1/5 Point .....	Aug 1962 .....	9-31 - 9-36
One Lane Live Load – Hinge at 1/6 Point .....	Aug 1962 .....	9-37 - 9-42
One Lane Live Load – Hinge at 1/7 Point .....	Aug 1962 .....	9-43 - 9-48
One Lane Live Load – Hinge at 1/8 Point .....	Feb 1965 .....	9-49 - 9-54
One Lane Live Load – Hinge at 1/9 Point .....	Aug 1967 .....	9-55 - 9-60
One Lane Live Load – Hinge at 1/10 Point.....	Aug 1967 .....	9-61 - 9-66
One Lane Live Load – Hinge at 1/11 Point .....	Aug 1967 .....	9-67 - 9-72
One Lane Live Load – Hinge at 1/12 Point.....	Aug 1967 .....	9-73 - 9-78
Table of Maximum Moments for Permit Load .....	Mar 1986 .....	9-81, 9-81.1
Table of Maximum Moments for Permit Load (cont.)..	Jun 1979 .....	9-81.2 - 9-81.5
Steam Railroad Loading – Class E-10 .....	Aug 1967 .....	9-95, 9-96

---

## Section 10 – Type Selection

General Features of Design .....	Dec 1987 .....	10-1, 10-2
Clearance at Structures .....	Apr 1993 .....	10-3 – 10-11
Curbs.....	Mar 1991 .....	10-12
Concrete Barriers and Barrier Railings (Structures) ....	Feb 1985 .....	10-13
Combination Railings (Vehicular and Pedestrian) .....	Feb 1982 .....	10-14, 10-15

## Section 10 – Type Selection - *continued*

### Combination Railings for Bridge Structures

(Vehicle and Pedestrian) .....	Feb 1982 .....	10-16
Pedestrian Railings for Bridge Structures .....	Feb 1982 .....	10-17
Roadway Drainage .....	Feb 1982 .....	10-18
Surfacing on Bridges .....	Feb 1982 .....	10-19, 10-20
Selection of Type (Structures) .....	Feb 1990 .....	10-21
General .....	Feb 1990 .....	10-21
Report .....	Feb 1990 .....	10-21, 10-22
“Structure Type Selection” Form DSD-0045 .....	Feb 1990 .....	10-23
Alternative Designs .....	Feb 1990 .....	10-24
Characteristics of Types of Structures .....	Feb 1990 .....	10-24
Slab, T-Beam.....	Feb 1990 .....	10-25
Box Girder (CIP Reinforced) .....	Feb 1990 .....	10-26
Box Girder (CIP Prestressed) .....	Feb 1990 .....	10-26
Prestressed Concrete Slabs .....	Feb 1990 .....	10-27
Prestressed Concrete Girders (Precast) .....	Feb 1990 .....	10-27
Composite Welded Girder .....	Feb 1990 .....	10-28
Railroad Structures (Steel) .....	Feb 1990 .....	10-29
Railroad Structures (Prestressed Concrete) .....	Feb 1990 .....	10-29
Pedestrian Structures .....	Feb 1990 .....	10-29
Abutments .....	Feb 1990 .....	10-30
Abutment Types .....	Feb 1990 .....	10-31
Piers or Bents .....	Feb 1990 .....	10-32
Slopes at Abutments .....	Feb 1990 .....	10-33
Bridge Numbers .....	Feb 1990 .....	10-34
Kinds of Structures .....	Feb 1990 .....	10-35
Structure Types .....	Feb 1990 .....	10-36
Concrete Bridges .....	Feb 1990 .....	10-37, 10-38
Bridges .....	Feb 1990 .....	10-39
Separations and Interchanges .....	Feb 1990 .....	10-40
Overheads and Underpasses .....	Feb 1990 .....	10-41

Pedestrian Traffic .....	Feb 1990 .....	10-42
Miscellaneous Structures .....	Feb 1990 .....	10-43

---

## Section 11 – Estimating

Introduction .....	Mar 2005 .....	11-1
General .....	Mar 2005 .....	11-1
BEES (Basic Engineering Estimate System) .....	Mar 2005 .....	11-1
Revised Estimates .....	Mar 2005 .....	11-1
Quantity Calculations .....	Mar 2005 .....	11-2
Escalation Factor .....	Mar 2005 .....	11-2
Mobilization Factor .....	Mar 2005 .....	11-2
Contingency Factors .....	Mar 2005 .....	11-2
Stage Construction .....	Mar 2005 .....	11-2
Traffic Control .....	Mar 2005 .....	11-3
Working Days .....	Mar 2005 .....	11-3
Historical Cost Record .....	Mar 2005 .....	11-3
Planning Estimates (Advance Planning Studies) .....	Mar 2005 .....	11-4
General Plan Estimates .....	Mar 2005 .....	11-4
Bar Reinforcement /m <sup>3</sup> of Concrete for		
Various Bridge Parts .....	Mar 2005 .....	11-5
Type 1 Retaining Wall Excavation and		
Backfill Quantities .....	Mar 2005 .....	11-5
Quantity Survey Graphs for Superstructure Concrete,		
Bar Reinforcing, and Prestressing Steel .....	Mar 2005 .....	11-7 - 11-20
Marginal Estimates .....	Mar 2005 .....	11-21
Quantity Take-Off Procedures .....	Mar 2005 .....	11-21
Bar Reinforcing Steel Example .....	Mar 2005 .....	11-22
Lump Sum Items .....	Mar 2005 .....	11-23
Fully Compensated Items .....	Mar 2005 .....	11-23
Structure Type Coding .....	Mar 2005 .....	11-24

## Section 11 – Estimating - *continued*

### Concrete Type Limits and Division Between

Superstructure and Substructure .....	Mar 2005 .....	11-26
Quantity Calculations and Summary Sheets .....	Mar 2005 .....	11-27
Quantity Summaries Transmitted to Resident Engineer's		
Pending File, After Bid Acceptance .....	Mar 2005 .....	11-28
Aids for Determining Quantities Marginal Estimates ...	Mar 2005 .....	11-30 - 11-37
Item Descriptions and Limits and Methods of Payment	Mar 2005 .....	11-39
Listed by Section .....	Mar 2005 .....	11-39
Alphabetical Listing of Items .....	Mar 2005 .....	11-42
Description of Contract Items .....	Mar 2005 .....	11-44
Bar Reinforcing Steel .....	Mar 2005 .....	11-44
Concrete .....	Mar 2005 .....	11-46
Deck Rehabilitation Items .....	Mar 2005 .....	11-49
Earthquake Restrainers, Retrofit, and Repair ....	Mar 2005 .....	11-50
Earthwork .....	Mar 2005 .....	11-52
Joint Seals .....	Mar 2005 .....	11-56
Metal .....	Mar 2005 .....	11-56
Piling (Excluding CISS) .....	Mar 2005 .....	11-57
Cast-in-Steel-Shell (CISS) Concrete Piling .....	Mar 2005 .....	11-58
Non-Standard Piling .....	Mar 2005 .....	11-59
Pipes, Conduits, Drains .....	Mar 2005 .....	11-65
Precast Girders .....	Mar 2005 .....	11-66
Prestressing Steel .....	Mar 2005 .....	11-66
Railings and Barriers .....	Mar 2005 .....	11-67
Structural Steel .....	Mar 2005 .....	11-67
Walls .....	Mar 2005 .....	11-68
Miscellaneous .....	Mar 2005 .....	11-70

---

## Section 12 – Piles

Validity of Pile Shaft Design .....	Mar 1990 .....	12-0
Pile Shaft Design .....	Sep 1986 .....	12-30 – 12-49

---

## Section 13 – Columns

Design of Single Column Bents for 2-Span Box		
Girder Bridges .....	Aug 1989 .....	13-1
Column Reinforcement for Prestressed Box Girders ..	Aug 1989 .....	13-3, 13-4
Example Column/Footing Design (using STD Charts)..	Aug 1989 .....	13-5, 13-6
Live Loads .....	Aug 1989 .....	13-7
Use of YIELD Program .....	Aug 1989 .....	13-8
Column Interaction Graphs .....	Aug 1989 .....	13-9 - 13-63

---

## Section 14 – Seismic

Dynamic Model Assumptions and Adjustments .....	Oct 1989 .....	14-1 - 14-10
Equivalent Static Analysis of Restrainers .....	Oct 1989 .....	14-11 - 14-25

---

## Section 15 – Miscellaneous

Stair and Ramp Ratios .....	May 1962 .....	15-1
Foundation Investigation and Reports .....	Jan 1989 .....	15-2
Checklist for Structure Foundation Studies		
and Reports .....	Jan 1989 .....	15-3 - 15-6
As-Built Plans .....	Jan 1989 .....	15-7

---

## Section 16 – Sound Walls

Sound Wall Design .....	Oct 1990 .....	16-1 - 16-8
Interaction Diagrams .....	Oct 1990 .....	16-9 - 16-24
Sound Wall – Standard Aesthetic Features .....	Oct 1990 .....	16-25
Masonry Block .....	Oct 1990 .....	16-25 - 16-27
Precast Concrete Panels with Posts .....	Oct 1990 .....	16-28 - 16-31
Cast-In-Place Concrete .....	Oct 1990 .....	16-32 - 16-34
Composite Plaster Panel Sound Wall .....	Oct 1990 .....	16-35 - 16-37

---

## Section 17 – Deck Drains

Deck Drainage Design .....	Oct 1989 .....	17-1
1. Run-Off Analysis .....	Oct 1989 .....	17-1
2. Capacity of Grate Inlets in a Sag .....	Oct 1989 .....	17-1
3. Sheet Flow .....	Oct 1989 .....	17-2
4. Flow in Gutters .....	Oct 1989 .....	17-2
5. Example Drainage Design .....	Oct 1989 .....	17-3
6. Detailing Practice .....	Oct 1989 .....	17-9
Examples of details for special applications:		
Deck Drain Pipe Detail at Abutment .....	Oct 1989 .....	17-9
Expansion Coupling .....	Oct 1989 .....	17-10
Part Bridge Section – Deck Drain Locations Oct 1989 .....	Oct 1989 .....	17-11
Deck Drain Pipe Detail at Hinge .....	Oct 1989 .....	17-12
Scupper Detail .....	Oct 1989 .....	17-13
Double Deck Drain, Drop Through		
Deck Drain .....	Oct 1989 .....	17-14

---
